

PRASANNA GUDURU

Product Designer · UX/UI Designer · Visual Designer

Prasanna.designer6@gmail.com · [linkedin.com/in](https://www.linkedin.com/in/prasanna-gudururu) · phone: 510 519 6016.

PROFESSIONAL SUMMARY

- Product and UX/UI Designer with around 8 years of hands-on experience designing intuitive, research-driven digital products across enterprise software, edtech, retail, and consumer platforms.
- Proficient in end-to-end design processes — user research, journey mapping, information architecture, wireframing, prototyping, usability testing, and high-fidelity UI delivery using Figma.
- Strong foundation in Human-Computer Interaction (Master's, SUNY Oswego) with a practical understanding of how design decisions translate to engineering implementation.
- Experienced in working in Agile/Scrum environments, collaborating closely with product managers, engineers, and stakeholders to deliver user-centered features on schedule. Skilled in building and scaling design systems and component libraries that ensure consistency across products and reduce design-to-development friction.
- Adept at designing for accessibility (WCAG), responsive interfaces, and data-intensive dashboards with complex interaction models.
- Hands-on experience building AI-powered web applications and data visualization tools, bridging the gap between design and front-end development.
- Excellent communicator with a track record of translating ambiguous business problems into structured UX solutions through research, synthesis, and iterative design.

PROFESSIONAL EXPERIENCE

Product Designer | **Nikshi Technologies**, Remote

May 2025 – Present

Description: Contributing to the design and development of product experiences at Nikshi Technologies. Responsible for owning end-to-end design for platform features, collaborating with product and engineering to ensure high-quality, user-centered outcomes aligned with business objectives.

Responsibilities:

- Own end-to-end product design for key platform features — from initial discovery and research through wireframes, prototypes, and production-ready high-fidelity UI.
- Facilitate user research sessions, including interviews, surveys, and usability tests; synthesize findings into actionable design recommendations for product prioritization.
- Collaborate with engineers and product managers to define interaction patterns, edge cases, and system behaviors, ensuring design intent is accurately implemented.
- Build and maintain a scalable component library in Figma to drive consistency across the product and reduce design-to-development handoff time.
- Create detailed design documentation, including user flows, interaction specs, and annotated prototypes for engineering teams.
- Conduct heuristic evaluations and competitive benchmarking to inform design direction and identify UX gaps in existing workflows.
- Participate in sprint ceremonies—planning, standups, and retrospectives—contributing design timelines and proactively communicating blockers.
- Apply accessibility best practices (WCAG 2.1) across all UI components to ensure inclusive design for diverse user groups.

Technologies Used: *Figma, FigJam, Notion, Maze, Miro, HTML/CSS, Agile/Scrum*

UX/UI & Brand Designer | **Ukraft Designs**, Syracuse, NY

Feb 2024 – Apr 2025

Description: Founded and operated Ukraft Designs, an independent design studio offering UX/UI, brand identity, and digital product design services to small businesses in the food & beverage and retail sectors.

Responsibilities:

- Designed and developed an AI-powered business analytics dashboard for a retail client, integrating real-time sales data visualization, inventory tracking, and AI-driven insights.
- Produced 40+ branded graphic design assets for a restaurant client (Masala Heaven), including menus, social media content, event collateral, and promotional materials across six visual categories.
- Designed an interactive Disney-themed Sweet 16 digital invitation for a private event, combining custom illustration concepts, animation, and interactive RSVP functionality.
- Led end-to-end UX process for all client projects — stakeholder interviews, problem statements, user personas, journey maps, wireframes, and high-fidelity Figma prototypes.
- Built functional HTML/CSS prototypes and interactive web artifacts to validate designs with clients before development handoff.
- Managed project timelines, client feedback cycles, and deliverable handoffs independently across concurrent projects.
- Developed case studies and portfolio documentation for each project, capturing research process, design decisions, and measurable outcomes.

Technologies Used: *Figma, Adobe Illustrator, Adobe Photoshop, HTML/CSS, Notion, Canva, React (prototyping)*

UX/UI Designer | Brainpreneurs Education, India , May 2019 – Nov 2022

Description: Worked as a UX/UI Designer on edtech products serving K–12 and higher education learners. Responsible for designing intuitive learning interfaces, building component systems, and conducting user research to improve student engagement and learning outcomes.

Responsibilities:

- Designed end-to-end user experiences for web and mobile edtech platforms, including course dashboards, assessment flows, learner onboarding, and progress tracking modules.
- Conducted user interviews, surveys, and contextual inquiry sessions with students, educators, and administrators to surface pain points and inform design direction.
- Created detailed wireframes, user flows, interaction models, and high-fidelity prototypes in Figma for iterative design reviews with product and engineering teams.
- Built and maintained a shared component library and design system, enabling faster and more consistent UI development across multiple product lines.
- Collaborated with front-end developers during implementation, providing design QA, redlines, and interaction specifications to ensure pixel-accurate delivery.
- Designed adaptive learning interfaces accommodating diverse learner personas, age groups, and accessibility needs, adhering to WCAG 2.1 guidelines.
- Contributed to information architecture and content strategy for course builder tools, improving content creator workflows and reducing task completion time.
- Performed usability testing with target users and synthesized findings into design improvements, tracking key usability metrics over release cycles.

Technologies Used: *Figma, Adobe XD, InVision, Zeplin, Adobe Illustrator, Miro, Hotjar, Google Analytics, Agile/Scrum*

UX/UI Designer | Eficens software, India Jul 2017 – Apr 2019

Description: Contributed to enterprise UX design projects at Eficens, working with large-scale clients across banking, insurance, and logistics sectors. Focused on translating complex business requirements into clean, functional, and user-centered digital interfaces.

Responsibilities:

- Designed user interfaces for enterprise web applications serving internal and external end-users across banking, insurance, and supply chain verticals.
- Translated ambiguous business requirements into structured user flows, wireframes, and high-fidelity prototypes aligned with stakeholder goals.
- Collaborated within cross-functional Agile/Scrum teams across design sprints and delivery cycles, engaging with product owners, BAs, and developers.
- Conducted heuristic evaluations, competitive audits, and user walkthroughs to identify UX gaps and validate design decisions prior to development handoff.

- Contributed to enterprise UI pattern libraries, ensuring visual and interaction consistency across large-scale applications.
- Applied responsive design principles and accessibility standards (WCAG) to ensure interfaces performed across devices and met compliance requirements.
- Worked closely with front-end developers during build phases, providing annotated design specifications, asset handoffs, and design QA support.
- Participated in client presentations and design reviews, communicating design rationale clearly to both technical and non-technical stakeholders.

Technologies Used: *Adobe XD, Sketch, InVision, Balsamiq, Zeplin, Adobe Illustrator, JIRA, Agile/Scrum*

E D U C A T I O N

Master of Science — Human-Computer Interaction — SUNY, Oswego / MAY 2024

Bachelor of Engineering — Electronics & Communications Engineering — India / 2018

S K I L L S & T O O L S

Design	Product Design, UX/UI Design, Interaction Design, Visual Design, Motion Design
Research	User Interviews, Usability Testing, Heuristic Evaluation, Journey Mapping, Personas, A/B Testing
Systems	Design Systems, Component Libraries, Atomic Design, Style Guides, Design Tokens
Tools	Figma, Fig Jam, Adobe XD, InVision, Sketch, Zeplin, Maze, Miro, Notion, ProtoPie
Visual	Adobe Illustrator, Photoshop, Canva, Typography, Brand Identity
Front-End	HTML5, CSS3, SCSS, JavaScript (basics), React (prototyping), Responsive Design
Domain	EdTech, Enterprise SaaS, IoT Platforms, Retail, Fintech, Consumer Apps
Process	Agile/Scrum, Design Sprints, Stakeholder Presentations, Cross-functional Collaboration, Design QA
