PROFESSIONAL HIGHLIGHTS:

UX/Product Designer (4+ years) specializing in enterprise dashboards, AI-driven workflows, and user research. Skilled in turning complex data into intuitive experiences that improve usability, retention, and business outcomes. Adept at fast-paced agile environments and cross-functional collaboration to deliver scalable design systems.

SKILLS:

UX & Product: Wireframing ,Prototyping , Design Systems , User Journeys , User Flows , Heuristic Evaluation , Visual Design , Accessibility (WCAG)

Research & Strategy: UX Research ,User Interviews ,Usability Testing , A/B Testing ,Persona Development , Feature Prioritization, Data-driven Design

Dashboard & Analytics UX: SaaS Dashboards, Data Visualization, IoT & AI Interfaces, Workflow UX ,Information Architecture

Tools: Figma ,Sketch ,Adobe XD ,Photoshop, Illustrator, Miro ,Framer ,HTML/CSS , Jira, Confluence, Notion, InVision

PROFESSIONAL EXPERIENCE:

UX Designer Ukraft designs| NY, USA

Jan 2025 to Present

- Led end-to-end redesigns for enterprise AI/IoT dashboards, improving task completion rate by 22% and reducing time-to-insight by 35% through streamlined navigation, data-driven prioritization, and reusable Figma components.
- Built and standardized a modular Figma component library that increased UI consistency by 40% and reduced design-to-engineering rework by 18%, accelerating delivery across cross-functional sprints.
- Conducted iterative usability testing with technical & non-technical users, identifying friction points that boosted user satisfaction +19% and reduced error frequency by 15% in complex workflow tasks.
- Partnered closely with PMs, data teams, and engineering to align UX strategy with delivery milestones, helping decrease development clarification cycles by 28% and improving sprint velocity by ~12%.
- Improved accessibility across primary UX flows by integrating WCAG-aligned patterns, improving readability for diverse user groups and increasing discoverability of key actions by 22%.
- Enhanced dashboard information hierarchy and visualization logic, enabling faster decision-making and contributing to a 14% increase in returning daily user engagement for industrial analytics workflows.

UX Designer Intern

INSPYR Solutions | NY, USA

Apr 2024 to Dec 2024

- Increased feature adoption by 20% by refining onboarding tooltips and progressive disclosure UX patterns.
- Built consistent, accessible UIs using design systems and front-end tools (HTML, CSS, JavaScript), collaborating with dev teams via Jira, Confluence, and Notion in agile sprints.
- Redesigned SaaS dashboard UI for IoT analytics, increasing user retention 15% and boosting data visibility for enterprise clients.
- Led 12 usability sessions, identifying issues that improved user satisfaction +18% and reduced support tickets by 30%.
- Improved task completion rate by 22% after redesigning core workflows based on user testing insights.
- Partnered with engineering & PMs to ship 5+ design features, improving task completion time by 22% and reducing onboarding friction.
- Shortened form completion time by 35% by removing friction steps and optimizing input validation logic.
- Reduced onboarding drop-off by 27% by simplifying authentication and redesigning welcome flow.

Product Designer

Brainpreneurs Education – Ed-Tech & Healthcare| INDIA

Jan 2021 to Nov 2022

- Improved dashboard usability by reducing time-to-task by 40%, increasing user satisfaction +18%.
- Built design components in Figma that cut UI inconsistencies ~40% and reduced dev alignment time ~20%.
- Simplified onboarding and micro-interactions, reducing drop-offs by 22% and boosting activation +15%.
- Conducted user research & usability testing with 25+ users, improving workflow efficiency 18–25%.
- Designed data-centric dashboards that enhanced reporting accuracy +30% and increased reuse of insights ~20%.

EDUCATION:

Master's in Human Computer Interaction

State University of New York | NY, USA | Dec 2024

Bachelor of Technology (B.Tech) in ECT

Vignan's University, India |May 2021

PROJECTS:

- **IoT Analytics Dashboard UX:** Redesigned device insights dashboard; reduced user task time by 40% using prioritization-based layouts.
- **Fintech Transaction Flow:** Simplified onboarding journey; **reduced abandonment rate 27%** with clearer user feedback.
- **Education Progress Tracker:** Built Figma-based components enabling **modular UI scalability** for multi-grade systems.
